

MathTV Playlists

The playlist feature on www.mathtv.com can be used many different ways. If you are a student, you can keep track of problems that you had trouble with, in order to review them before an exam.

If you are an instructor, you can select videos to go with your course outline. You can do a few examples in class, and let MathTV, do the rest, giving you more time to explain longer problems, or applications in class.

Here are three playlists that you can use to study for a tests or quizzes, or review for the final:

Test: Rational Expressions

<http://www.mathtv.com/index.php?playlist=220>

Test: Systems of Equations

<http://www.mathtv.com/index.php?playlist=221>

Test: Quadratic Equations

<http://www.mathtv.com/index.php?playlist=222>

Once you have created a playlist, you can share it with others by getting a link to it, and embedding the link in an email, or in a website, or on your Factbook, or MySpace pages.
